

Annual Safety Cabinet Compliance and Maintenance Service

Compliance requirements that allow lawful storage of various classes of chemicals are clearly stated in a range of Australian Standards.

AS1940-2004 Storage and Handling of Flammable & Combustible Liquids

AS3780-2008 Storage and Handling of Corrosive Substances

AS/NZS4452:1997 Storage and Handling of Toxic Substances

In order to ensure that your cabinet meets the requirements of these standards, Spill Station Australia offer a complete scheduled maintenance service.

This 21 point checklist covers structural and operational elements and address all of the compliance requirements to ensure that you continue to store you chemicals in a safe and lawful manner.

This service includes maintenance of self-closing mechanism, sequential closing system, latching and internal opening mechanisms.

Complete reports on the condition of each cabinet are provided after our thorough inspection and repairs undertaken if required. Additional costs may apply.

If you have purchased a Total Containment safety cabinet from Spill Station Australia and choose to take advantage of this service programme, we will increase you warranty from 2 years to 5 years.

This independent 3rd party compliance check by our team of trained technicians will ensure that your investment in compliant safety cabinet is protected and your workplace and staff are not at risk from unsafe chemical storage.

Cost:

To site mobilisation fee	\$30.00
Service fee per cabinet	\$60.00
Additional non-warranty repairs	\$70.00 per hour +parts
