

# Safety Shower/Eyewash Compliance Inspection and Sanitise Service

Just because you bought a compliant safety shower and eyewash it is not the end of your responsibility. In order for your equipment to remain compliant, a scheduled maintenance system must be in place.

AS4775:2007 states:

***“All shower units shall be inspected annually to ensure conformance with the requirements of this Standard. A tag should be permanently attached to each shower unit, to be marked at the successful completion of each inspection.”***

Spill Station offer a complete shower and eyewash inspection, testing and sanitising service to ensure you and your equipment complies with the Standard.

This service includes a 38 point service and compliance audit in accordance with AS4775:2007.

The equipment covered in this service includes:

- Safety Showers
- Eyewash Equipment
- Eye/facewash Equipment
- Drench Hose
- Eyewash Bottles
- Self-Contained Eyewash Equipment

The Spill Station shower and eyewash testing service specialises in laboratories, prep rooms and other interior locations where sensitive equipment is housed.

Our team of trained technicians ensure that your floors are left dry and test water is contained in the test apparatus.

**Other Spill Station compliance services:**

***Spill Kit inspection and refill***

***Safety cabinet inspection and maintenance***

***Spill response gap analysis and report***
